

As a resident of Miami, it is impossible for me to find a radio station offering classical music; a station offering talk radio that appeals to something other than 18 to 34 year old males; an English language AM station. The list goes on. Xm Radio offers me a variety of music and intelligent conversation that is truly not available to me through any other venue. I urge you to REJECT NAB's petition 04-160. Please do not force listeners like me to turn off their radios entirely because there is quite literally nothing offered in the local market that is worth listening to.
